DESIGN RULES IN IEC 61439 – LOW VOLTAGE SWITCHGEAR

AN EXAMPLE OF COMMON SENSE TO BE FOLLOWED

(T = temperature rise F =electrodynamical forces P = overpressures – internal arc)

Item	RULES	T	F	P
1	Short time withstand current , is lower or equal than the one of the tested reference design ?		X	X
2	Cross section of the busbar is greater than or equal the one of reference design ?	X		
3	Distance between phases of busbar is greater than or equal to the reference design ?	X	X	
4	Bus bar insulators are of the same type, shape and material ? Distance between insulators are equal to or smaller than in the reference design ?		X	
5	Materials, properties of materials and mounting are equal to the reference design ?	X	X	X
6	Short-circuit protection devices ... are equivalent to those of the same brand and series ... ?			
7	Length of the live unprotected conductor is less than or equal to the reference design ?			
8	If the set has certain type of enclosure was it included in the tests of the reference design ?	X	X	X
9	The compartment to be verified is of the same model, type and has at least the same dimensions?	X		X
10	Compartments have the same mechanical design and dimensions of the reference design ?	X		X
If "YES" to all requirements there is no need to test If "NO" to any requirement an additional verification is needed (simulations)
